Network powered by Digital Enablement

Bryan Horne – Vice President Enterprise Digital Journeys

The all-in-one platform that powers your next move

A platform designed for next-generation applications

APPLICATION

Managed orchestration

Hybrid-cloud diversity

Software-defined networks

Integrated Security

THE LUMEN PLATFORM

INFRASTRUCTURE

~400K

Global fiber route miles

2200+

Global on-net public and private data centers

60+

Edge compute nodes

6300+

Internet AS's connected

150K+

On-net fiber locations

NaaS is a fundamentally different experience to buy, use, and manage networking services

Today

Buy easily

- Long negotiation cycles with long-term, inflexible contracts

Install & use seamlessly

- "Months" to activate service
- High complexity in managing services; multiple nodes to configure vs. single control point

Flexible and customizable

- Friction in adding services
- Limited accessibility to APIs / UIs

Network stack

Distributed "best of breed" solutions requiring complex management

NaaS Tomorrow

Fundamentally different and better way to serve products, making customer experience:

- Digital / self-serve
- Dynamic / flexible
- Seamless / easy-to-use
- Integrated and automated

Expanded offering via additional up-stack capabilities on top of connectivity using APIs and UI

Highly automated and integrated experience

Transforming the internet experience

Dynamic network on-demand

- Real-time internet provisioning for next-gen IT agility
- Quickly turn up new cloud-based applications and services
- Create dynamic internet redundancy and failover for business continuity

Fast & reliable Internet

- 99.99% service availability SLA
- Scalable, enterprise-grade, high bandwidth internet, up to 10 Gbps
- Minimize network hops for high-quality connection with speed and resiliency

Dedicated & secure connectivity

- Securely extend private networks by leveraging Lumen's inherently secure and redundant infrastructure
- Lumen global network continually monitored & mitigated for vulnerabilities by Black Lotus Labs

Easy, exceptional experience

- Easily managed from a single portal
- Real-time provisioning
- Hours of capacity billing
- Provision and monitor your network seamlessly
