Customer Solutions,  
Comcast Business

# Cyber Threats Are Outpacing Our Ability to Deal With Them

## Risk of Major Cyberattacks Has Never Been Greater

### Rapidly growing global digital economy

is expanding the cyber-attack surface worldwide.

### Accelerating digital transformation

is increasing cyber risks and threats.

### Escalating vulnerabilities and cyberattacks

are overwhelming cyber experts and defenses.

### AI and cybercrime-as-a-service

are lowering barriers to entry and enabling cyberattacks with unprecedented scale, sophistication, and speed.

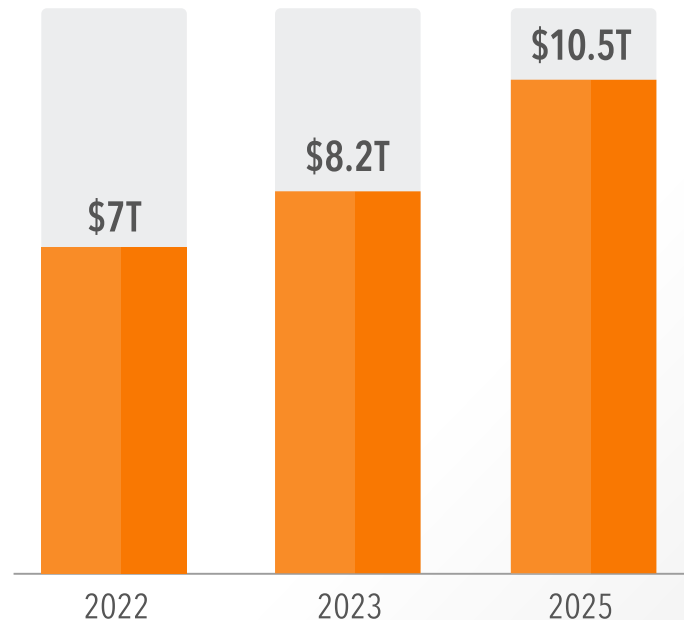

### Worldwide shortage of skilled cybersecurity experts

is exposing organizations to greater risks.

### Rising geopolitical instability

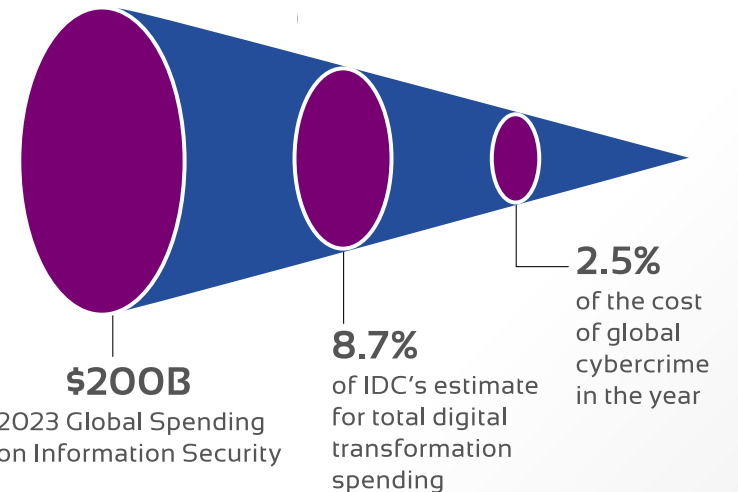

is fueling more aggressive cyberattacks against critical infrastructure.

## Cybercrime Costs Are Exploding Worldwide

Cybersecurity Ventures

## Cybersecurity Spending is Not Keeping up with Challenge
