Next Generation Billing for On-Demand Services

MEF Accelerator Live Stone Panther
October 2023

On-Demand-Services: Fiber, xDSL etc.

Pain Points

Data quality issues

Manual work

Long processing times

Lost deals, lost revenue

Unpaid invoices

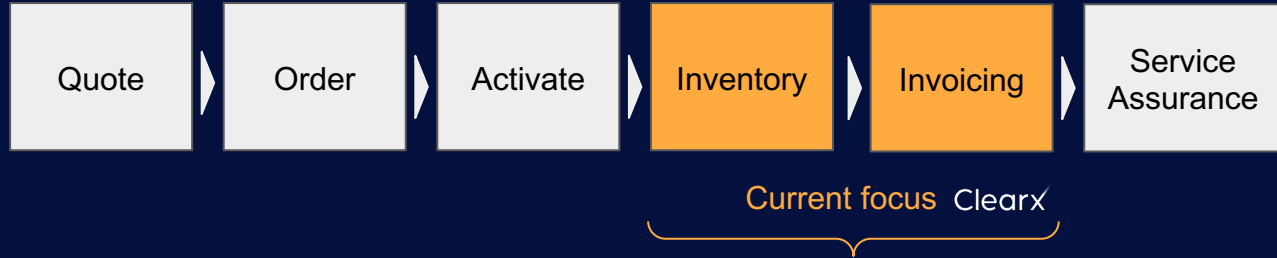

Opportunities

1. Move to **inventory based verification process** with standardized data model
2. Create **one source of truth for inventory** & transactions before invoicing
3. Establish externally confirmed inventory & unique billing statements for invoices
4. Improve data reporting for discrepancy management

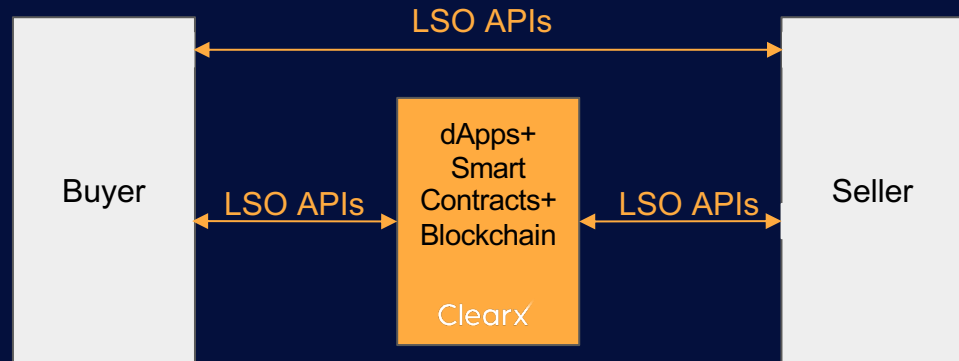

MEF Compliant Next Generation Billing Solution

MEF Process Chain

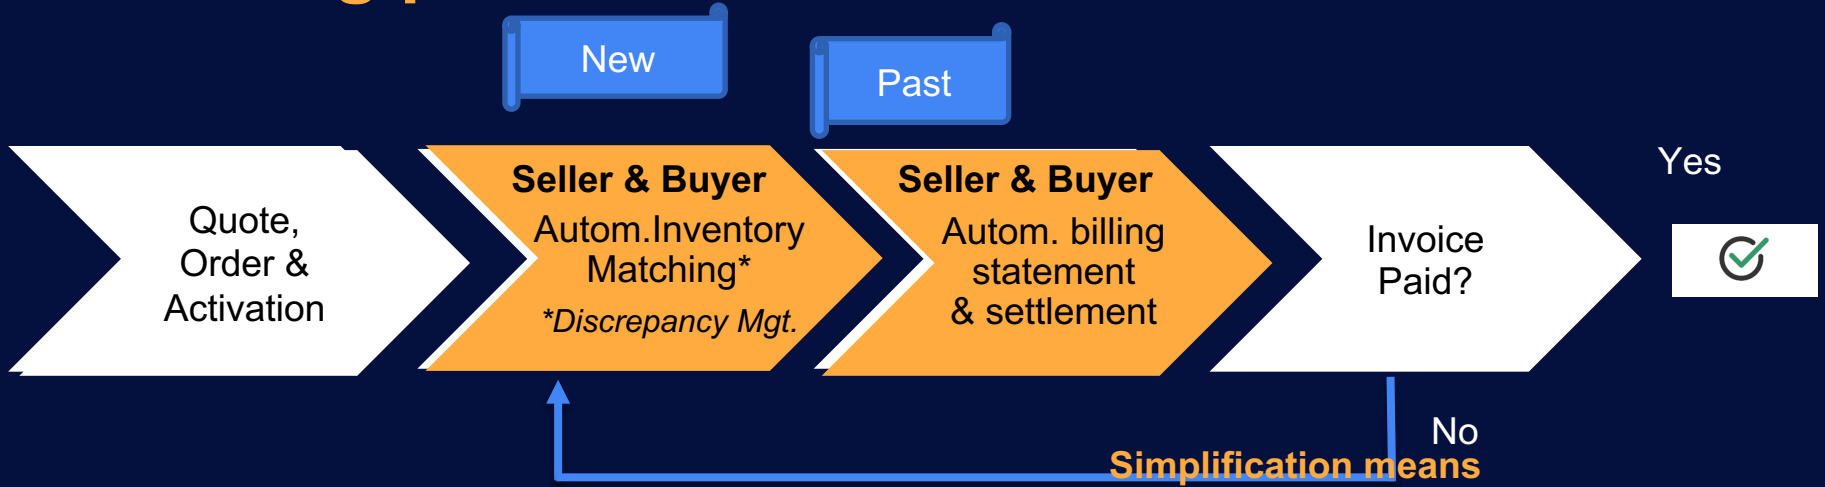

First MEF compliant Next Generation Billing solution for On-Demand Services.

- Designed to become a vendor agnostic solution
- MEF compliant data model
- Using MEF LSO APIs

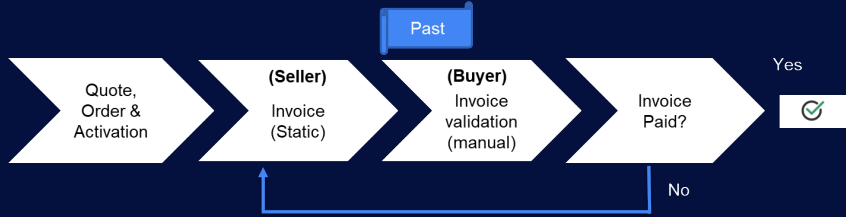

Invoicing process then & now

Reactive & labor intense dispute process.
Full invoice on hold until resolution!

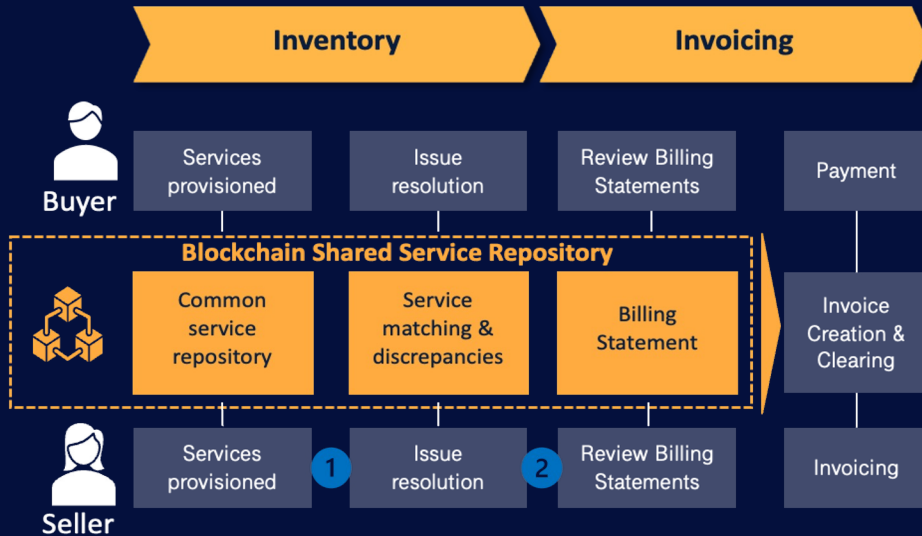

- Less manual work, better cashflow
- Complements your NaaS solution
- Complementary to MEF APIs

Reactive & labor intense dispute process.
Full invoice on hold until resolution!

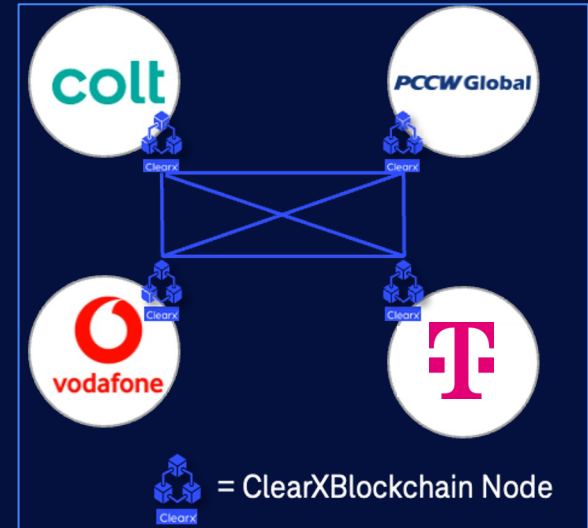

Solution & Current Network

Solution

- 1 **Inventory matching:** Single source of truth for services delivered. Externally confirmed and auditable inventory
- 2 **Billing:** Real time exchange of financial liability. Invoice turnaround time from month to minutes Increased working capital

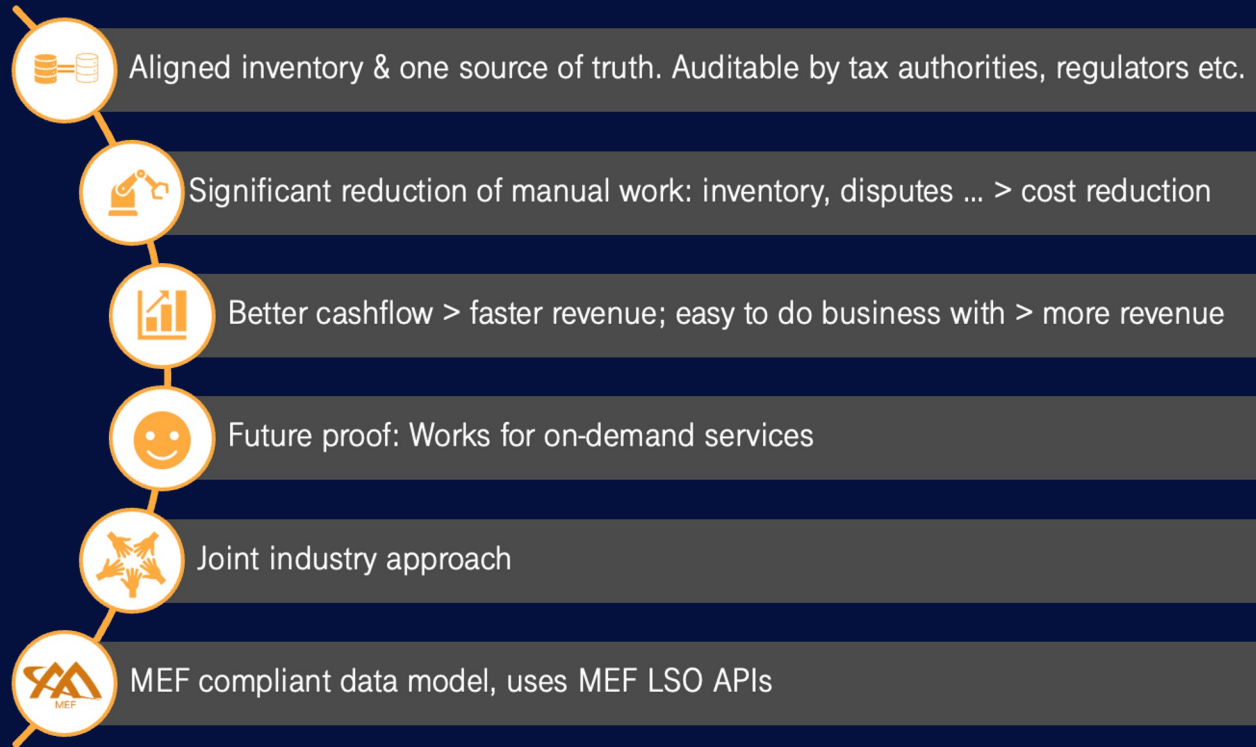

Current Network

Demo Video

Summary & Benefits

**“Join us and create
the future of
automated settlement”**

Video with SVPs

Incorporating AI into data services

Roadmapping AI enhanced dispute resolution to further automate processes

Current processes

Agreed amounts auto settled

System-assisted dispute resolution

Final negotiation on remaining amounts still manual

AI potential & benefits

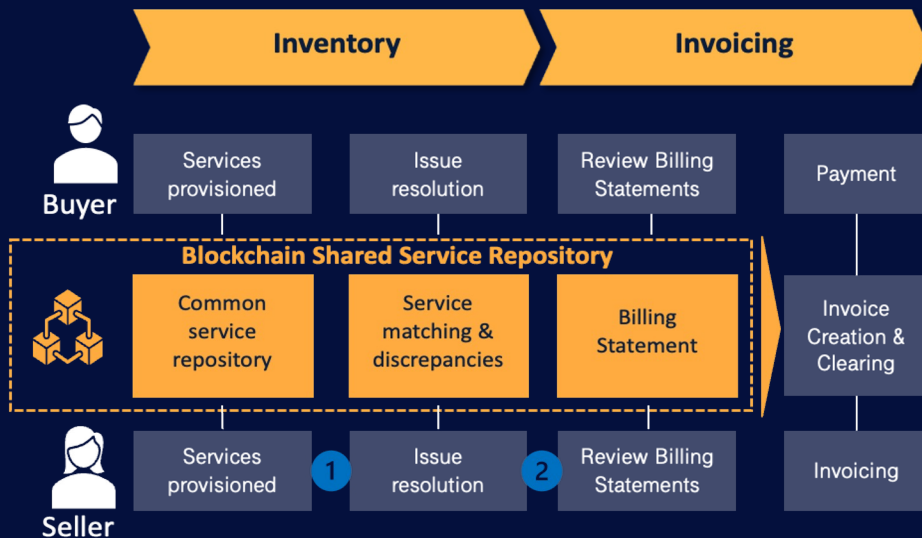

Use predictive capabilities to fully automate dispute resolution

Leverage machine learning to improve performance over time

*Opt-in module
